Whatever the test and conditions you put your engines through, Optibelt shows its strength and ensures you increased drive, efficiency, durability and superior performance. That is why Optibelt is one of the leading manufacturers of high performance drive solutions.

WAI provides parts for the Aftermarket of electrical rotating assembly. WAI provides automotive, heavy duty, agriculture and industrial customers with the highest quality standards. They provide their customers with the best product and the best price.

WAI offer customers 100% new alternators and starters for the rotating electrical market. All parts are tested to OEM specifications. Validation testing includes endurance, humidity, power thermal cycling, vibration, salt spray and thermal shock.

We offer sensors from Interstate-McBee and other high quality suppliers of electronic devices. The sensors are put through rigorous quality assurance and field testing to ensure our customers get the highest quality product.
