

HDX perts A/S

Heavy Duty Gas & Diesel Engine Xperts

From April 11th to 24th, HDX participated together with Interstate-McBee at the BAUMA – Munich exhibition. Some of us working for McBee and HDX have been doing this show since the middle of the nineties, and this was probably the busiest and most successful exhibition ever. We talked to hundreds of interesting people from all over the world during those 7 days the exhibition was open. We met many of our current customers, and established contact to many new potential customers and companies that showed our parts and business concept great interest. We want to thank all those that visit us at stand C4.503/L.

We highly appreciate everyone's interest for the engine parts displayed at our booth. Great interest was in the Cat[®] 3500 series steel piston we had in our booth, and the Cat[®] C-series and Cummins[®] QSB, QSC, QSL, QSX and QSK - Steel Pistons, and not to forget the newly released from Interstate-McBee, Cat[®] C18 and C32 Steel Cylinder Liner. We want to thank for all the positive and encouraging comments we received from our valuable customers that stopped by.

We look forward to establish fruitful and trustworthy relationship with all new contacts we met, and we are eager to explain the possibilities and options what the high quality engine parts from Interstate-McBee can bring to their businesses.

Please click on “New HDX Newsletter” to the left to see few pictures taken at the show.

Also, please read and review the latest April 2016 NPR (New Product Release) from Interstate-McBee, to be found in the our NPR section.
