

INTERSTATE-McBEE

Serving the diesel and natural gas industry for over 60 years.

New Product Release – May 2011

Expanded Cummins® midrange gasket set coverage from Interstate-McBee

Interstate-McBee releases five additional gasket sets for the popular Cummins® ISC, QSC, ISL and QSL9 engine models. The upper sets include the newly improved M-4981796 cylinder head gasket. This new gasket affords superior sealing and helps to prevent external coolant leaks. These models utilize high pressure common rail fuel systems in conjunction with the CM850 control module. The part numbers and basic applications are listed in the table below.

Model	Upper Gasket Set	Lower Gasket Set
ISC CM850 2002-2007	M-4089758	M-4089759
QSC CM850 2005 >	M-4089978	M-4089979
ISL CM850 2004-2007	M-4089758	M-4089759
QSL9 CM850 2004 >	M-4089978	M-4089889

Expanded parts coverage for Cummins® ISX/QSX from Interstate-McBee

Basic Engine:

Interstate-McBee now offers complete lower end bearing coverage for these popular engines. Refer to the table below for the current part numbers, size correlation and engine quantity required.

Part Number	Description	Qty
M-4089405	Connecting Rod Bearing STD	6
M-4090016	Connecting Rod Bearing .25mm Oversize	6
M-4090017	Connecting Rod Bearing .5mm Oversize	6
M-3800298	Main Bearing Set STD	1
M-4089845	Main Bearing Set .25mm Oversize	1
M-4089846	Main Bearing Set .5mm Oversize	1

New Product Release – May 2011

Expanded parts coverage for Cummins® ISX/QSX from Interstate-McBee (cont.)

Basic Engine:

M-2881682 Piston Ring Set

This latest ring set for the ISX engine series contains the latest design 2nd compression ring. The redesigned 2nd ring incorporates different lower edge geometry and increased end gap to promote improved upper oil control and reduced gas pressure between both compression rings. This addition will complement the very popular M-4089154 ring set for engines with articulated pistons.

Cooling System:

M-4089910 ISX02 Water Pump Assembly

This ISX pump is applicable to the 2002 – 2007 domestic engines that utilize the CM870 control module and EGR cooling. The pump has a higher flow capacity for the hotter EGR engines and has a 12 groove poly-vee pulley. The earlier non-EGR water pump part number M-4089908 is also readily available at Interstate-McBee.

Exclusive aftermarket coverage at Interstate-McBee for Detroit Diesel® S60/50

After many requests and inquiries from our customers, Interstate-McBee is pleased to announce immediate availability for bull gear assemblies for the Series 60/50 Detroit Diesel® engine line.

A-23513559 Bull Gear Assembly

This bull gear assembly is comprised of all new components and is fully assembled and preloaded with proper torque. Generally this assembly is used in 8.5L & 11.1L DDEC®III/IV engines and 12.7L & 14L DDEC®III and DDEC®IV non-EGR engines. Not only are these gears attractively priced, they also eliminate the extra burden of core charges and core return. Always verify proper usage with the engine serial number.

New Product Release – May 2011

STC (HVT) fuel injection coverage for Cummins® K-Series from Interstate-McBee

In addition to our extensive line of injector components for these variable timed K-series engines, Interstate-McBee is pleased to announce full parts coverage for the hydraulic tappets. With the recent addition of the top link and the improved style repair kit, Interstate-McBee has all options available for economical repair of these tappet assemblies. Refer to the table below for part number listing and usage.

Part Number	Description	Use
M-3075381	Tappet Assy. – Thick Flange	To replace complete worn units thick or thin
M-3804700	Tappet Kit	To rebuild acceptable thick flange tappets only
M-3052233	Top Link	To replace worn top links
M-3052231	Top Link Retainer	To replace worn top links

Caterpillar C15, C18 connecting rod bearings now available

M-2243246 BEARING-ROD STD. C15

Interstate-McBee continues its growth in Caterpillar products with the addition of M-2243246 connecting rod bearings for C15, C16 and C18 engine applications. These bearings are constructed from high strength tri-layer material for proper load carrying capacity. The bearings can be found in popular C15 ACERT® on highway engine applications.
