New Product Release – February 2012

New Cummins® C-series Marine engine coverage from Interstate-McBee

M-4020059 Piston Kit - C8.3M marine engines

M-4020062 Cylinder Kit - C8.3M marine engines

M-4955182 Inframe Engine Kit - C8.3M marine engines

The piston contained in the above piston kit is of the latest design. This piston body has a modified tapered balcony profile, an anodized top and combustion bowl and a coated piston skirt area. These features promote maximum durability for this demanding marine application.

Additional Cummins® electronic sensor coverage from Interstate-McBee

M-4984223 Position Sensor – Used on ISB, ISC, M11, ISM and KT engine models.

M-4921487 Oil Pressure Sensor – Used on ISB, N14 and KT engine models.

Electronic engines depend on specific sensors and switches for precise engine control. Listed above are the latest additions to our electronic component coverage for Cummins® applications. These two latest additions are camshaft or crankshaft position sensor assemblies, which includes the integral connection harness and seal ring, and an oil pressure sensor.

New Product Release – February 2012

More Popular Cylinder Head Components from Interstate-McBee

A-23534745 E3 Injector Tube for Detroit Diesel® Series 60 DDEC-VI

This stainless steel threaded tube is the third style used on this popular engine platform and was first used with MY2007 engine production. The A-23534745 tube is used in conjunction with seal ring A-23534743 as well as the three stainless shims required when the head has been resurfaced. All three styles of tubes, mounting parts and tube shims are readily available from Interstate-McBee.

M-2271200 Injector Sleeve Caterpillar® C7 & C9

This stainless steel sleeve is used with latest generation HEUI fuel injectors in the C7 & C9 engines. The M-2271200 sleeve is used with two M-8C0563 seal rings which need to be ordered separately. Both items are readily available from Interstate-McBee.

Another lower end bearing kit for Detroit Diesel® S-60 from Interstate-McBee

A-23535280 Lower End Bearing Kit - STD.

This new kit is in stock and contains all the components needed to replace the lower engine bearings on all EGR equipped Series 60 engines with standard size crankshafts. The EGR models were produced using four thrust washers of different designs.

The A-23535280 kit contains both the hook end style as well as the tabbed end style thrust washers and the proper main thrust bearing shells for either design. Stocking this kit will afford maximum coverage for this popular model.
